Led multi-market backend initiatives, driving vehicle financing and sales tools across seven African countries, enhancing performance and scalability through Node.js upgrades. Directed architecture revamps and client-focused software deployments as CTO, restoring key partnerships and accelerating delivery timelines. Skilled in cross-functional collaboration, cloud infrastructure management, and building secure, high-impact applications aligned with evolving industry standards.

Work Experience

Senior Backend Engineer · Autochek

October 2023 - Present

- Directed the migration of the codebase from Node.js 14 to 20, achieving performance improvements and aligning it with cutting-edge technologies and best security practices.
- Led the end-to-end development and unit testing of "Dealers Financing", a specialized product tailored for financing dealers involved in importing vehicles across multiple African markets at financing dealers who import cars into the country with markets in 7 African countries - Nigeria, Kenya, Ivory Coast, Senegal, Morocco, Uganda and Egypt.
- Orchestrated a collaborative effort with a team of 10 Engineers to develop a sales conversion tool which empowered marketers & dealers to effectively track online vehicle sales, optimizing commission structures and enhancing overall performance.

Chief Technical Officer (CTO) · Primed E-Health

January 2020 - October 2023

- Overhauled and led the revamp of software architecture in use with a remote team of 6 in 3 months to keep up with industry standards.
- Repaired fractured business relationships with 4+ clients by proposing and successfully deploying updated user-friendly applications for the clients use in record time.
- Identified emerging technologies and trends, and evaluated potential impact on the organization within a projected timeframe of 18 months for consideration by Senior Management.

Senior Software Developer · Primed E-Health

- Collaborated with a cross-functional remote team of 15 on the development of 3 software applications in 12 months.
- Defined the scope and process flows for projects alongside 2 Product Managers and UI/UX designers.
- Deployed 2 out of 3 projects within stipulated timeframe of 12 months.

Backend Developer/Dev Ops · Nahere Limited

November 2018 - March 2022

- Co-operated with technical teams from 3 companies to develop a Govt. owned platform which grants loans to petty traders.
- Debugged 50% of functional apps in company's ERP SaaS portfolio and coached Junior colleagues on system server setups.
- Innovated and ideated with 3 other team mates with approval from Senior Management the design of HRM application and wrote 2k+ lines of code as Backend Web developer for the app.
- Maintained server operations and activities for over 15 web applications, websites and companies, and ensured daily functionality.

- Liaised with product managers and stakeholders to gather requirements and design solutions for scalable web applications utilizing 3+ frameworks inclusive of Python.

Backend Engineer · Verscom Limited

November 2017 - November 2018

- Implemented and designed a scalable REST API in Nodejs and wrote unit and integration test to ensure API reliability daily.
- Monitored API performance using New Relic and combined forces with 4 Engineers to manage cloud infrastructures.
- Reviewed codes, provided constructive feedbacks to peers and proffered improvement suggestions.
- Supported clients by troubleshooting and rectifying Web application bugs.

Skills

Data Structure & Algorithm · Debugging · Machine Learning · Process Flow Design · Project Management · Software Architecture · Team Management · Troubleshooting

Technical Skills: PHP (Laravel, Codeigniter, Lumen) · Python (TensorFlow, FastAPI, Django) · ReactJS (Nextjs, Vite, Apollo Client) · React Native · Angular · NodeJS (Nestjs, Express, Fastify) · MySQL · Javascript · TypeScript · Golang · MongoDB · PostgreSQL · AWS (Lambda, ApiGateway, ECS) · GraphQL · Redis · gRPC · Apache Kafka · BullMQ · LLM

Education

National Open University of Nigeria | B.Sc.
